\* Actual output wattage ranging from 90% to 105% of the rated output wattage

\*\* Load calculation may change on a 3-phase system feed.

### Decor Plate Options

#### EF Series

### Why choose infrared

Unlike other supplemental heating appliances, infrared heaters do not heat the air and instead emit a clean, safe wavelength of light that only warms the objects the wavelength touches.

### Keep your space clean and green

Infrared heaters play a crucial role in reducing carbon footprints owing to their energy efficient operation and precise heating functions. Electric Infrared heaters have an impressive energy conversion rate exceeding 90%.

### Control in style

EUROfase heaters can be easily controlled using our On/Off switches, control panels, Wi-Fi/ Bluetooth controller, timers & dimmers, thermostats and more. We also, have the capability to customize a control solution to meet your project requirements
