Why Eurofase Heating

For over 35 years, Eurofase has been a trusted leader in premium lighting solutions, and our heating division continues this legacy by delivering high-performance heating systems that bring warmth and elegance to every space.

Heritage and Expertise

Backed by decades of design and engineering experience, we deliver heating and control solutions that embody quality and innovation.

Uncompromising Quality

Each Eurofase Heating product is crafted to the highest standards, ensuring reliability and long-lasting performance.

Aesthetic Design

Our heating solutions are designed to integrate seamlessly into various settings, complementing Eurofase's renowned lighting collections.

Efficiency and Comfort

We prioritize energy-efficient technology to provide warmth with minimal environmental impact.

EF Series

Power meets precision.

Our Performance Heating collection delivers maximum warmth with wide-range heat coverage, ideal for larger outdoor areas or high-demand settings.

Engineered for efficiency and durability, these high-output heaters are the backbone of comfort, offering powerful heat without compromising on design.

EF Series

316 Stainless Steel Marine Grade

Eurofase EF Series — Marine Grade

Engineered for Coastal and High-Salinity Environments

Construction	Dimensions
Stainless Steel	39.37"(L) x 8.18"(H) x 3"(D)
Marine Grade (316)	61.25"(L) x 8.18"(H) x 3"(D)
Color Options	
☒ Black ☐ White ☐ Stainless Steel	

The Eurofase EF Series Marine Grade infrared patio heater is purpose-built for installations in coastal, marine, and saline atmospheres where standard stainless-steel alloys are prone to surface degradation and pitting corrosion.

The heater enclosure is fabricated from 316 stainless steel. This material specification preserves both structural integrity and aesthetic finish across extended service intervals, even within direct exposure zones (typically within 1–5 km of an active shoreline).

For recessed and architecturally integrated applications, the EF Series is fully compatible with the matching 316 Marine Grade Flush Mount Kit.

Recommended applications: oceanfront residences, hospitality venues, resort properties, marinas, yacht clubs, and waterfront commercial developments.

Marine Grade Flush Mount Kits
(39" and 61" options)

LP Series

Subtle. Seamless. Sophisticated.

Designed to disappear into modern environments, the Low Profile Heating collection delivers refined warmth with a streamlined presence. Ideal for spaces where aesthetics are as important as comfort, these heaters blend cleanly into architectural and outdoor designs without distraction.

Mounting Options

Eurofase Heating offers a range of heater types and mounting options to suit various applications and installation needs.

Wall & Ceiling Mounting

Our heaters come with 6-inch brackets for easy wall or ceiling mounting. You can install them flat or angle them at 30° or 45° to deliver warmth exactly where you want it.

Compatible Models: Eurofase EF & LP Series.

Recessed Mounting

Recessed installations provide a sleek, minimalist aesthetic, ideal for contemporary residential, commercial, or hospitality settings. Eurofase offers a certified turnkey solution with flush mount kits, fire-rated boxes, and all necessary mounting accessories for an easy, professional installation.

Compatible Models: Eurofase EF Series.

Note: Décor plate options are not compatible with recessed mounting.

- * Installation of the heater and flush mount kit is not suitable for pitched angles.
- * Flush mount kits are only suitable for flat, non-sloped ceiling applications.

Suspension Mounting

For sloped or vaulted ceilings, or spaces with ceilings higher than 12 feet, Eurofase's telescopic suspension kits offer a perfect solution. These kits allow for level mounting on uneven surfaces, ensuring safe, even heat distribution in a complex ceiling environment.

Compatible Models: Eurofase EF & LP Series.

Pole Mounting

If wall or ceiling installation isn't an option, pole mounting provides a durable and flexible solution. Eurofase poles are 8 feet tall, available in single or dual-head configurations, and feature concealed wiring. Outdoor switches can be mounted directly on the pole, and heaters may be angled at 0°, 15°, 30°, 45°, or 60° for optimal performance.

Compatible Models: Eurofase EF & LP Series.

Control System

Choose from our range of control options to match your desired level of convenience, functionality, and budget. Whether you prefer simple on/off control or advanced smart features, we have a solution that fits your needs.

Basic Controls

Single Paddle Switches: Heavy-duty switches rated for 20 amps, provide simple on/off functionality for single-element heaters.

Duplex/Stacked Switches: Heavy-duty switches rated for 30 amps, allow independent control of each element in dual-element heaters, offering on/off and high/low settings.

Smart Controls

Smart Wi-Fi/Bluetooth Controller: Requires one module per heater. This cost-effective upgrade provides smart functionality, including on/off, high/low settings, programmable dimming timer, and a 3-hour auto shut-off. Multiple heaters can be seamlessly managed through the Eurofase Heating app.

Advanced Controls

Contactor Box:

Functions as a sub-panel, enabling zoning of heaters. Compatible with on/off switches, wall timers, programmable sequential timers, and more. Supports smart home integration, with each zone handling up to 40 amps.

LUTRON **CRESTRON** Control4

+ Other Smart Home Systems

Universal Relay Panel:

Functions as a sub-panel with zoning capability. Designed for smart home integration and compatible with dimmers, timers, and other control options to adjust heat intensity. Each zone supports up to 50 amps.

LUTRON **CRESTRON** Control4

+ Other Smart Home Systems

Complimentary Designs *Delivered within 24 hours.*

Eurofase provides personalized, turnkey solutions that deliver consistent, reliable comfort.

Analysis

Your unique requirements are evaluated and used to create a tailored solution that optimizes efficiency and comfort.

Design & Simulation

Mapping simulations are used to optimize heat distribution and placement to ensure higher efficiency.

Implementation

Eurofase works with your architects, engineers, and electricians to ensure a smooth installation process.

Wiring Diagrams

Our engineering team will develop custom wiring diagrams tailored to each project, recommending the optimal wiring conditions.
